

## **Why Should I Have a policy from the Texas Windstorm Association?**

Living along the Texas Gulf Coast is a lifestyle envied by many. However, the risk of insuring these homes has become so great that most insurance companies choose not to.

Hurricanes are the type of threat that make premium determination difficult. So many insurance companies simply choose to undertake risks on homes in what they call tier ONE counties.

Your agent can write a fire/hazard policy along with separate windstorm coverage through Texas Windstorm Insurance Association.

Remember, the Texas windstorm policy will only cover claims for wind and / or hail. Neither the fire policy nor the windstorm policy will cover damages from rising water (flooding).

Call us to help you put these policies in place. Then kickback and enjoy an abundant life because now you have “peace of mind”.
